BALL SOLUTIONS

Hartford Technologies is a Leader in Precision Balls for Dispensing Pumps and Spray Applications

Our Goal is to Partner with You in Identifying the Best-possible Alternatives for Your Next Project!

Hartford dispensing balls are manufactured in a multitude of materials to meet customer requirements for hardness, chemical compatibility and recyclability, as well as FDA and EC/EMEA requirements. We specialize in working with customers to identify the best solutions for conventional or airless spray pumps, lotion pumps, atomizers, or continuous or metered aerosol cans.

Hartford balls are specified for dispensing applications within the health care, cosmetics and fragrances, and household products industries, and for specialty applications such as the dispensing of pet treats, and adhesives.

Hartford Technologies specializes in high-volume consumer product programs, including national roll-outs that demand highly structured delivery schedules. Our rapid prototyping service is recognized as one of the industry's preeminent resources for the development and testing of dispensing balls for complex applications. Hartford's two-continent manufacturing system provides competitive and logistical advantages for customers who distribute worldwide.

Hartford Quality = Zero PPM Rejects

Hartford Technologies is ISO 9001-2000 certified. We also conform to ABMA standards regarding surface, sphericity, and size. Our quality commitment also includes APQP*, a process that ensures that product design meets customer expectations, while promoting strategies that design-out potential problems, and boost productivity for Hartford customers.

**Advanced Product Quality Planning*

Hartford manufactures precision stainless steel balls for dispensing applications in 440c, 430, 420, 316, and 304/302/18-8, in a broad range of sizes. We are also a leading manufacturer of dispensing balls made from glass, and plastics.

Hartford stainless steel dispensing balls – one of our most in-demand products – are well-suited to the growing array of aerosol food and beverage products, which now include aerosol pancakes and food foams, as well as more conventional products such as cooking sprays and cheese.
